(1) A California governmental unit may increase its appropriation limit by either the annual percentage increase in California fourth quarter per capita personal income, or the percentage increase in the local assessment roll from the preceding year due to the addition of local non-residential construction, whichever greater.

Summary:

In November, 1979, the voters of California approved the addition of Article XI 11B to the State Constitution. This amendment provided a maximum annual percentage that proceeds of taxes could increase. We have to comply with the legislation by annually establishing an appropriation limit for the amount we receive from property taxes and the earnings we receive on the investment of tax revenues. If the actual proceeds ever exceed this limit, refund of the excess would have to be made. Refunds of taxes collected have not had to be made in the past, and refunds in the future are doubtful as the percentage increase against the base year is increasing greater than our share of the 1% property tax.

Under Proposition 111, the method of calculating the annual appropriation limit was revised, effective July 1, 1990. The California Constitution specifies that the appropriation limit may increase annually by a factor comprised of the change in population combined with either the change in California per capita personal income or the change in local assessment role due to local nonresidential construction. The appropriation limit method recommended for adoption uses the highest of the options available to maximize our limit for 2024-25 which is set at \$2,351,504.

Government Code Section 7910 also requires a 15-day period for our calculations to be available to the public for their review, if desired. The Public Notice was posted May 29, 2024 in compliance with this requirement.
